THE IDEAL SOLUTION FOR PROVIDING SHORT TERM SECURITY AT REMOTE LOCATIONS.

The CMS-900-8D is ready for any mission in an environment. No matter what equipment you want to deploy on it, the CMS-900-8D can handle all of your power and communication needs. The 900-watt solar array is capable of charging your batteries and keeping them charged when it can see the southern sky. In the event you can't see the southern sky, like being in downtown major city surrounded by buildings we have optional power. Built into the trailer is shore power to either charge your batteries when in the field or when the trailer is stored back at headquarters. No outlet nearby. No problem with the optional generator on board you can charge your batteries back up in no time.

Any environment, any time of day the CMS-1000 will be dependable platform for your mission critical equipment.
